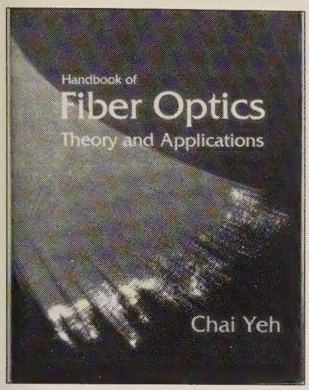
New Information to Help Update Your Skills



Handbook of Fiber Optics

Theory and Applications

Chai Yeh

Here is a comprehensive reference with state-of-the-art information on fiber optics. It includes data on optic fibers and fiber materials, light sources and detectors, and couplers, LEDs, and other individual components.

Whether involved in fiber optics research, design, or practical implementation of systems, this handbook will be of great use. Published in an 8-1/2 x 11 inch format.

March 1990, 382 pages, $79.95 (tentative)
ISBN: 0-12-770455-8

Chemistry at Interfaces

Finlay MacRitchie

This work presents a practical approach to interfacial chemistry and provides students and research workers without surface chemistry training with the means to set up and use interfacial techniques and interpret measurements.

January 1990, c. 283 pages, $49.95
ISBN: 0-12-464785-5

Laser Spectroscopy IX

Proceedings of the Ninth International Conference on Laser Spectroscopy, Bretton Woods, New Hampshire, June 18–23, 1989

edited by

Michael S. Feld, John E. Thomas, and Aram Mooradian

December 1989, 536 pages, $49.95
ISBN: 0-12-251930-2

Polarized Light in Optics and Spectroscopy

David S. Kliger, James W. Lewis, and Cora Einterz Randall

This practical guide:

- Describes polarized light at laser powers, including power handling capabilities of optical elements and limitations of laser depolarizers
- Starts at a basic level and develops tools for research problems
- Discusses practical devices for controlling polarized light
- Compares the Jones, Mueller, and Poincaré sphere methods of analysis

June 1990, c. 304 pages, $59.95 (tentative)
ISBN: 0-12-414975-8

Practical Fourier Transform Infrared Spectroscopy

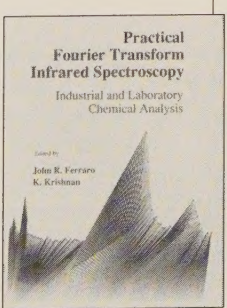
Industrial and Laboratory Chemical Analysis

edited by

John R. Ferraro and K. Krishnan

This survey highlights many new methods and techniques of particular interest to the scientific community. Techniques such as FT-IR microsampling and FT-Raman are featured as well as new statistical methods of quantitative FT-IR.

December 1989
534 pages, $69.00
ISBN: 0-12-254125-1



An Introduction to Dynamic Light Scattering of Macromolecules

Kenneth S. Schmitz

This reference offers a comprehensive study of DLS by macromolecular and polyelectrolyte solutions. With an emphasis on the interpretation of DLS data, the material is organized according to the increasing complexity of the system, ranging from dilute solutions of noninteracting small particles to the more complex multicomponent systems of strongly interacting large particles. Problem sets, chapter summations, and a well-developed bibliography make this a valuable reference.

April 1990, c. 448 pages, $79.95 (tentative)
ISBN: 0-12-627260-3

Sol–Gel Science

The Physics and Chemistry of Sol–Gel Processing

C. Jeffrey Brinker and George W. Scherer

Sol–Gel Science is the first book to assimilate the principles of chemistry, physics, and materials science to provide a fundamental understanding of sol–gel processing.

March 1990, c. 784 pages
$135.00 (tentative)/ISBN: 0-12-134970-5
Pre-publication price: $110.00

An International Journal Designed for the Diverse Community of Users and Developers of Novel X-Ray Imaging and Analysis Techniques

Journal of X-Ray Science and Technology

Editor-in-Chief: **Larry Knight**
Brigham Young University, Provo, Utah

The **Journal of X-Ray Science and Technology** is designed to provide scientists and engineers with a single literature source covering new developments in the field of x-ray imaging and analysis techniques.

Research Areas Include

- Applications: analytical, nondestructive testing, microelectronics, biological/medical imaging, x-ray astronomy, materials and surface science
- Interaction of x rays with matter: x-ray phenomena and optical constants
- Sources: synchrotron-generated x rays, x-ray lasers, laser-produced plasmas, novel solid sources
- Optical elements: grazing incidence optics, multilayer mirrors, zone plates, gratings
- Optical instruments: interferometers, spectrometers, microscopes, telescopes, microprobes
- Detectors: CCD arrays, position-sensitive detectors
- Signal processing: coded imaging, tomography
- Related topics and future trends

Volume 3 (1991), 4 issues ISSN 0895-3996 In the U.S.A. and Canada: $104.00 All other countries: $116.

Manuscripts may be submitted in quadruplicate to:
JOURNAL OF X-RAY SCIENCE AND TECHNOLOGY
Editorial Office
1250 Sixth Avenue, San Diego, CA 92101

Sample copies and privileged personal rates are available upon request.
